Store Activity:

During the year, the Company closed 15 stores and opened 16 locations to end the year with 324 Company-owned stores including 265 in North America and 59 in Europe. (See Company-Owned Store Activity Schedule.) The Company's international franchisees ended the year with 71 stores.

Balance Sheet:

As of January 3, 2015, cash and cash equivalents totaled \$65.4 million. The Company ended the 2014 fourth quarter with no borrowings under its revolving credit facility. Total inventory at year end was \$51.9 million compared to \$50.2 million at 2013 year end. Inventory per square foot increased 4.9% as compared to the prior year period. In fiscal 2014, capital expenditures were \$10.9 million; depreciation and amortization was \$18.1 million. In fiscal 2015, the Company expects capital expenditures to be approximately \$20 million to \$25 million to support the refresh and repositioning of stores as well as investment in infrastructure. Depreciation and amortization is expected to be approximately \$16 million to \$18 million.

2015 Key Strategic Initiatives:

To increase shareholder value, the Company will begin to evolve from its stated goal of “sustained profitability” to “sustained profitable *growth*”. Through a combination of *continuous improvement* of current efforts and *strategic expansion* into additive opportunities for each of the key initiatives outlined below, the Company expects to deliver both incremental revenue and profit. The four key initiatives are:

Expanding into More Places

The Company intends to continuously improve its real estate model by strategically evolving its store portfolio to align with market trends while selectively opening new locations and systematically refreshing its store base. To this end, the Company plans to open additional stores in high potential destinations such as tourist locations, outlet malls and shop-in-shops, which have proven more productive than traditional mall stores.

The Company expects to strategically expand its international presence by leveraging the improving strength in its company-owned stores to restructure and extend its international footprint. In 2014, the Company added a new franchisee in Turkey and restructured and expanded its franchise agreement in Germany with the addition of two countries, Switzerland and Austria. In 2015, the Company plans to enter new markets with both a redesigned franchise model and organic corporate expansion.

Targeting More People

The Company intends to continuously grow its business with its core three to twelve year-old consumer segment which represents a majority of current revenue. The Company will focus on initiatives that drive trial and increase repeat visits with an evolved segmentation, product development and marketing strategy.

The Company expects to strategically grow sales to consumers over twelve years-old with a focus on key categories including gift-giving, affinity and collectibles. This consumer segment currently represents over 20% of sales and has a tendency to over-index on less price-sensitive “gift-able” and on-line purchases. Therefore, the Company intends to leverage its e-commerce business to efficiently target these consumers.

Developing More Products:

The Company intends to continuously improve and extend its efforts to successfully develop high impact product stories coupled with integrated marketing programs that tend to garner higher price points, drive add-on purchases and create “play beyond the plush”.

The Company also plans to strategically expand its presence and create new sales and profit streams by launching an out-bound licensing program to leverage its strong brand equity. Licensing will enable the Company to extend its brand reach with new offerings in relevant categories and will provide consumers with “products beyond the plush”.

Driving More Profitability:

The Company intends to continuously improve its value engineering initiatives to further optimize product margins while implementing new systems that facilitate sales growth, increase efficiency and improve long term profitability.

The Company expects to strategically expand its profitability by prioritizing incremental growth initiatives, like those discussed above, that leverage existing infrastructure, are primarily royalty-based, and/or allow for discreet pricing and are therefore comparatively margin-accretive.
